Station Chepauk, Madras., *Dated the* 29th November, 1941.

From (Name) SRI RAO BAHADUR L.VENKATAKRISHNA AYYAR, B.A. B.E.,
(Designation) CHIEF ENGINEER, P.W.D. (GENERAL).

To The Secretary to the Government of Madras,
PUBLIC WORKS Department.

Sir,

1 (a) I forward herewith a copy of letter No.714 C.G. dated 26-11-1941 from the Superintending Engineer, Bezwada Circle, requesting sanction to the continuance of the Supervisor and peon employed on the Plassey Barracks work for a further period upto the end of March, 1942. Sanction till that period (end of March, 1942) was originally applied for, but Government in their Order No.2736 dated 8.11.41 referred to above, accorded sanction only till 10-12-1941 A.N., on the ground that there was not much work remaining to be done. The Executive Engineer, Bellary Division, has furnished a statement showing the work yet to be done and the probable time required therefor, and has reported that it will not be possible for the regular Supervisor to attend to those items of work in addition to his already heavy duties.

(b) In the circumstances explained, I request that sanction of Government may kindly be accorded to the further continuance of the Supervisor and peon for Plassey Barracks work from 11-12-1941 F.N. to 31-3-42 A.N. or date of completion of the work whichever is earlier.

5

Nature of Work.	Time required.
(d) Completion of all Measurement Books and submission for record. ..	61 Nos. 1-2-42 to 31-3-42
4. GENERAL ITEMS TO BE ATTENDED TO.	
(a) Materials awaiting disposal for adjustment. (b) Disposal of references connected with Alipuram Jail and Junior Certified School.	Relating to the entire period of extension asked for, i.e., up to 31-3-1942.

Sd. T.S. Venkateswarlu,
Executive Engineer,
Bellary Division.

Copy submitted to the Chief Engineer, P.W.D., General, Madras, with reference to his Endorsement No. 6540-C/41-C.R., dated 11---11---1941.

2. Under the circumstances explained by the Executive Engineer, I consider that the continuance of the Supervisor, till the end of 31-3-1942 is absolutely necessary. I request that sanction of Government may kindly be obtained for the continuance of the Supervisor and Peon till the above date.

H.G. Jackson, 25/11/1941,
Superintending Engineer,
Bezwada Circle, Bezwada.

No. 114 C *dated* 6-11 19 .

Short title Continuance of Plassey Barracks Supervisor beyond 10-12-1941 - Proposal.

READ—the following:—

Letter No. 1849-E.E., dated 18th November, 1941 from the Executive Engineer, Bellary Division, Bellary to the Superintending Engineer, Bezwada Circle, Bezwada.

Refee:- Your No. 879-B., dated 13--11--1941.

---

1) The important work remaining yet to be done is "Providing a new Pumping Plant" Estimate Rs. 5,000/- Even though the Engine and Pump are to be supplied and fitted by the Firm, yet the preparing of foundations and fixing of anchor bolts have to be done by other agency. The fitting up of pumps, etc., require close supervision and as the work is about six miles from Bellary, it cannot be expected to be attended to by the regular Supervisor, who is already over-worked.

2) The fixing up of the pumps and the laying of pipe lines may not be completed before end of January as some of the materials have to be specially manufactured In additional, there are some minor items of work mentioned in the statement annexed herewith and which are yet to be taken up and these may be expected to be completed only by end of 1/42.

3) Though most of the scheme might be deemed to have been completed for the purpose of progress report and for all administrative and statistical purposes, the closing of the accounts of the scheme entails considerable volume of work requiring exclusively the services of an executive subordinate as described in the statement annexed. Of those items, the revision of the Register of Buildings is the most complicated job as the several items under each work have to be classified either as special repairs or Improvements. This may not be finished even before March 1942, as the valuation of the several buildings, improved or altered, have to be appraised after disposing of all materials outstanding in the accounts to the extent of Rs. Rs. 5,000/- roughly.

4) In view of the emergent nature of the work, materials were obtained from several sources, the adjustment of cost whereof requires the assistance of the subordinate employed on the execution of the works and the disposal of the materials now outstanding cannot be attended to by the regular Section Officer at this stage.

5) The final outlay has to be apportioned among the various subsidiary buildings with reference to each item of work measured and paid from the commencement of the scheme. The Register of Buildings demands a thorough revision on completion of the scheme and this important item of work will be held up for a long time, and may even for all time, if left over to the Section Officer, whose

own works, whose work is already in heavy arrears, in spite of all possible strain.

The continuance of the Special Supervisor till 10-12-1941 as now sanctioned, will only enable him to prepare and submit all final bills and it will be humanly impossible to attend to the other items of work referred to in detail in the Statement appended herewith. The pumps and other materials for the pumping plant may not even be received at the site by that time.

The items of work devolving on the special Section Officer are such that all these can neither be finished before 10-12-1941 not could they be entrusted to the Section Officer, Bellary. for reasons mentioned above.

The closing of the special Section a few months earlier than 31-3-1942 would result in the accumulation of arrears which are already prevailing in the Sub Division; consequently, it may lead to confusion as is the case with Adoni Water Supply Scheme.

I, therefore, strongly recommend the continuance of the Supervisor till the end of March 1942, and I request that the demand may have your full support.

Sd. T.S. Venkateswarlu,
Executive Engineer,
Bellary Division.

STATEMENT SHOWING WORK YET TO BE DONE AND TIME REQUIRED.

Nature of Work.	Time required.
1. RECORDING OF FINAL MEASUREMENTS AND PREPARATION OF FINAL BILLS FOR WORKS COMPLETED.	
(a) Additional kitchen.	
(b) Food moulding shed.
